LONG JUMP

During Long Jump competitions sprint along a runway and jump as far as possible into a sandpit from a wooden take-off board. The distance travelled, from the edge of the board to the closest indentation in the sand to it, is then measured. If an athlete steps beyond the board, a foul is committed and the jump is not measured.

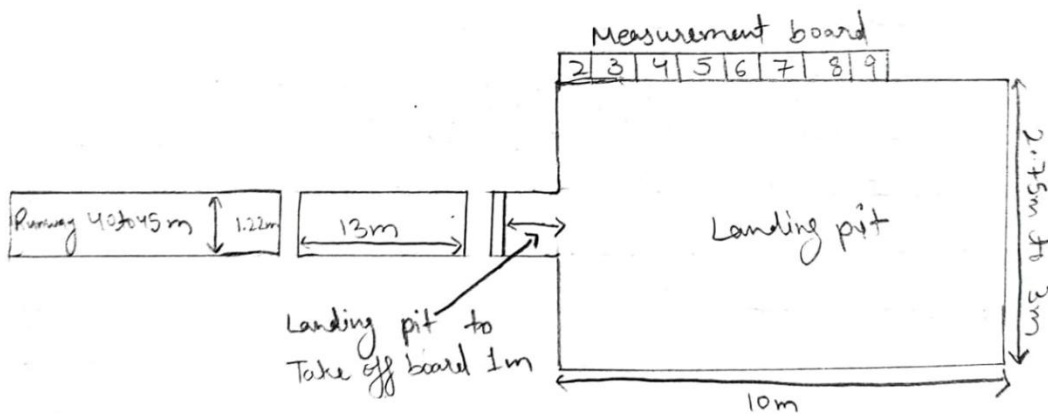

Most championship competitions involve six jumps per competitor, although usually a number of them, those with the shorter marks, are often eliminated after three jumps. If competitors are tied, the athlete with the next best distance is declared the winner.

LABEL

the advantages to wholesaler and retailer.

Certification Labelling

- The label indicates that the item has been tested by a laboratory usually one independent of the manufacturer of the product.
- Each label may establish its own fixed standard of quality.
- These certification labels are often referred to as seals of approval.
- For e.g. Good House Keeping seals of approval, patents magazine and international fabric care institute seal for wash ability and dry clean ability.

Grade Labelling

- It identifies the quality of the product by a letter or number or a word to denote a grade.
- The characteristics of a fabric are compared with one or more standards a products which measures up to a recognized and accepted standard is a standard grade.
- Grade labelling necessitates not only standardization but also some type of organization to check on the merchandise and enforce the rules.
