COMPUTER SCIENCE

Course Outcomes of BA(Computer Science)

Program Outcomes

PO1: Preparing students in a range of technological fields including programming, database theory, web designing and computer applications.

PO2: Understand, analyze and implement computer programs in the areas related to algorithm and web design for efficient design of computer based system.

PO3: Ability to select recent computing tools, skills and techniques compulsory for original software solutions.

PO4: Aptitude to enhance comprehensive understanding of the theory and its application in diverse fields.

PO5: Ability to design complex solutions to meet desired needs within realistic constraints such as safety and security while using different applications.

Program Specific Outcomes

PSO1: Students will be prepared for the potentially rich and career-enhancing sector of computer applications.

PSO2: Continue higher education in the field of Computer Science or Applications.

PSO3: Start their own business in the Indian and international software market.

PSO4: Meet the requirements of the Industrial standards.

PSO5: Ability to engage in independent learning for continuous self-development as a computing professional.

Class/ Code/ Course Name	Course Outcomes
BA(CS) (I Sem) Paper–CS01 Theory-A Computer Fundamentals	CO1: Understanding of basic Computer Terminology. CO2: Formulation of opinions about the impact of computers on society. CO3: Acquire a fundamental understanding of hardware peripherals. CO4: Develop interests in using computers for professional work.
BA(CS) (I Sem) Paper –CS02 Theory-B PC Software	CO1: Work effectively with a range of current, standard, Office Productivity software applications. CO2: Understanding of operating system – Interface and organizing files and folders. CO3: Operate a variety of advanced spreadsheet, operating system and word processing functions. CO4: Evaluate, select and use office productivity software appropriate to a given situation.
BA(CS) (I Sem) Paper – PCS01 Practical-C Practical Based on Paper – CS02	CO1: Implementation of commands in MS-DOS CO2: Familiarizing with Office software (Word processing, Spreadsheets and Presentation). CO3: Solve a range of real world problems using office productivity applications, and adapt quickly to new software releases.
BA(CS) (II Sem) Paper-CS03 Theory-A Operating System Concepts	CO1: Understanding the components, types and working of Operating System. CO2: Evaluate the effectiveness of various scheduling algorithms as well as the rules for concurrency and deadlock management. CO3: Understanding the concepts of file and process management. CO4: Understanding of various memory management algorithms and basic operations on files and directories
BA(CS) (II Sem) Paper-CS04 Theory-B C Programming	CO1: Knowledge of basic concepts of C Language like: Arrays, Pointers, File Handling. CO2: Skill to execute real world problems in C Language

MA (ENGLISH)

Programme Outcome

PO1: Students will have Knowledge of the history of the various Periods and Movements in the English Literature.

PO2: As the programme offers study not only of literature written in English language but also English translations of literary texts written in Indian languages offering diversity to the student.

PO3: The programme aims to familiarize the students with the theories, approaches, methods, and specific techniques towards understanding English literature and language.

PO5: The programme will equip students with an awareness of socio-political and economic conditions of the English society in different historical and literary periods, which will help students develop an ability to read texts in relation to their historical and cultural contexts.

PO6: The Programme will enable the students to analyse literature and fiction using appropriate theoretical, historical, and cultural apparatus. Students get to know various cultures and the construction of gender, nation and race throughout history

Program Specific Outcomes

PSO1: Students will be prepared for the potentially rich and career-enhancing field of Doctoral research.

PSO2: In terms of employability, the students will become well trained for fields such as content writing in both government as well as private sector, especially Information and Broadcasting sector.

PSO3: The students will possess the basic knowledge associated with translation and a short-term diploma course in translation will open up avenues for them in both government and private sector.

PSO4: On completion of the course, the students become eligible for employment in government sector as a language officer.

PSO5: The students also become eligible for UGC-NET, the basic eligibility criteria for the post of Assistant Professor across India.

PROGRAM SPECIFIC OUTCOMES

PSO1: Comprehensive Economic Understanding: Demonstrate a comprehensive understanding of economic theories, principles, and laws, and their application to both microeconomic and macroeconomic systems. This includes the ability to analyze economic behavior, market structures, factor pricing, and economic policies.

PSO2: Proficiency in Statistical and Mathematical Tools: Exhibit proficiency in collecting, presenting, analyzing, and interpreting economic data using statistical and mathematical tools. Apply these tools to solve real-world economic problems and hypotheses testing.

PSO3: Application of Economic Policies: Apply economic theories and considerations to comprehend and evaluate various economic policies, including trade policy, fiscal policy, monetary policy, public finance, and budgetary policy. Understand the implications of these policies on resource allocation and income distribution.

PSO4: Econometric Analysis Skills: Gain proficiency in basic and applied econometric techniques and methods used for empirical research in economics. Develop skills for conducting empirical analysis, interpreting results, and making informed economic inferences.

PSO5: Developmental Perspectives: Understand the theoretical and practical aspects of development economics, including the measurement of development, poverty, inequalities, and issues related to education, health, sanitation, energy, environment, infrastructure, and economic planning.

PSO6: Insight into Indian Economy: Acquire an in-depth insight into the performance and functioning of different sectors of the Indian economy. Understand the historical and contemporary policy frameworks that govern these sectors.

PSO7: Enhanced Analytical and Problem-Solving Skills: Strengthen analytical thinking and problem-solving abilities through the study of economics. Apply economic theories, quantitative techniques, and logical reasoning to critically assess and analyze economic situations and issues.

PSO8: Research and Critical Thinking Abilities: Develop research skills and critical thinking abilities by understanding and identifying economic problems, proposing research methodologies, collecting and analyzing data, and offering well-reasoned solutions. Cultivate independent thinking and logical reasoning.

influence consumer behavior.

CO3 At the end of the course, the students will be able to relate internal dynamics such as personality, perception, learning, motivation and attitude to the choices made by the consumers.

CO4 The course helps in making appropriate research approaches including sampling, data collection and questionnaire design for specific marketing situations.

CO5: At the end of the course, students will be able to assess and evaluate the internal and external factors through which they will be able to understand consumer behavior.

CO 6 The students will be able to apply relevant consumer behavior theories in Understanding the impact of marketing strategies.

CO 7 The course will help the students to develop critical and reflexive understandings of the nature of consumption, markets and culture.

CO 8 At the end of the course, the students will be able to appreciate the complexity of consumer behavior.

BCA

Program Outcomes

PO1: Preparing students in a range of technological fields including programming, software engineering, database theory, computer applications and networking.

PO2: Understand, analyze and implement computer programs in the areas related to algorithm, web design and networking for efficient design of computer based system.

PO3: Ability to select recent computing tools, skills and techniques compulsory for original software solutions.

PO4: Aptitude to enhance comprehensive understanding of the theory and its application in diverse fields.

PO5: Ability to design complex solutions to meet desired needs within realistic constraints such as safety and security while using different applications.

Program Specific Outcomes

PSO1: Students will be prepared for the potentially rich and career-enhancing sector of computer applications.

PSO2: Continue higher education in the field of Computer Science or Applications.

PSO3: Start their own business in the Indian and international software market.

PSO4: Meet the requirements of the Industrial standards.

PSO5: Ability to engage in independent learning for continuous self-development as a computing professional.

Course Name and Code	Course Outcomes
BCA-1st Semester English (Compulsory) –A BCA-16-101	<p>CO1: The course enables students to have a broader understanding of literature through prescribed short stories, prose and poetry. The course acquaints the students with the fundamentals of poetry through several point of views through an extensive reading.</p> <p>CO2: It helps students to sharpen their writing and thinking skills through word formation from the stories and prose thus enabling them to dive deep into assigned texts.</p> <p>CO3: It equips the students with art of writing letters in a professional space thus enabling them to frame official and business letters.</p> <p>CO4: Translation, a necessary key for understanding and communicating in different languages in a professional space, enables the students to understand, express and enhance their learning and writing skills.</p> <p>CO5: To develop in the learners an appreciation of the subtle nuances of literary expressions</p>
BCA-1st Semester Fundamentals of Mathematical Statistics BCA-16-102	<p>CO1: Knowledge of fundamental concepts of statistics and learning of practical problems of topics like Mean, Median, Mode, Range and Dispersion.</p> <p>CO2: Determine and analyze the correlation between two or more variables.</p> <p>CO3: Learning of basic concepts and difference between Correlation and Regression.</p> <p>CO4: Formulation of linear regression equations and finding particular value</p>

	CO3: Use of JavaScript to develop the dynamic web pages
BCA-2nd Semester Object Oriented Programming using C++ BCA-16-204	CO1: Described the concepts of Object Oriented Programming with the knowledge of classes, streams, functions, polymorphism. CO2: Understanding of Dynamic memory allocation techniques. CO3: Simulate the problem in the subjects like operating system, computer networks and real world problems.
BCA-2nd Semester (Lab Based on BCA-16-203) BCA-16-205	CO1: Support the development of web pages. CO2: Write scripts and effectively incorporate JavaScript in a web page. CO3: Create forms and check for data accuracy. CO4: Use of JavaScript system objects. CO5: Embed objects in a web page. CO5: Effectively use decision and looping statements in JavaScript programs. CO6: Effectively manipulate strings and use of array processing.
BCA-2nd Semester (Lab based on BCA-16-204) BCA-16-206	CO1: Implementation of classes, objects, constructors, functions, inheritance in C++ Editor. CO2: Small projects based on the concepts of polymorphism, overloading etc. CO3: Implementation of real world problems in C++.
BCA-3rd Semester Punjabi-A BCA-16-301	CO1: The prescribed short stories and poetry enables the students to understand the different themes related to social, economic, political, religious aspects of the society. CO2: Students are introduced to the Phonetics of Punjabi phonemes.
BCA-3rd Semester History Culture and Punjab-A BCA-16-302	CO1: Understand the human evaluations like the transformations occurred right from Indus valley civilization. CO2: Compare and contrast various stages of progress from Indus valley civilization to Vedic age. Analyze the Jain, Buddhist and Vedic faiths. CO3: Analyze the emergence of the Mauryan and Gupta empires during the "Classical age" in Punjab. Critically examine the nature of monarchic rule and develop a comprehensive understanding of cultural evolution during ancient

	CO8: To understand the basic concept of 'Taylor Series' and solve various Mathematical problems using 'Taylor Series'.
BCA-3rd Semester Data Structures BCA-16-305	CO1: Understand the concept of Dynamic memory management, Data types, Algorithms, Big O notation. CO2: Understanding of basic data structures such as Arrays, Linked lists, Stacks, Queues, Trees and Graphs. CO3: Analysis of complexity of different Algorithms. CO4: Apply algorithms for solving problems like sorting, searching, insertion and deletion of data. CO5: Use of appropriate data structure to solve particular real world problems.
BCA-3rd Semester (Lab based on BCA-16-304) BCA-16-306	CO1: To demonstrate working of various numerical methods using C Programming. CO2: To impart knowledge of various statistical techniques using C Programming. CO3: To develop students' understanding through laboratory activities to solve problems related to above stated concepts.
BCA-3rd Semester (Lab based on BCA-16-305) BCA-16-307	CO1: Implementation of algorithms of different data structures using C language. CO2: Implementation of menu based small projects of Data structure. CO3: To develop students' understanding through laboratory activities to solve problems related to data structures.
BCA-4th Semester Punjabi-B BCA-16-401	CO1: The course equips the students with understanding of literature, grammar and language in general. CO2: It enables the students to explore various aspects of the literature and enhance the writing skills.
BCA-4th Semester History and Culture of Punjab-B	CO1: After completion of the course, student came to know about the reasons which led to establishment of the British rule in the Punjab, Board of administration. Analyze British policy towards education.

BCA-16-504)	CO3: Use of form controls with validation to collect user's input.
BCA-16-506	CO4: Perform database operations on PHP.
BCA-6th Semester E-Commerce BCA-16-601	CO1: Be able to learn the basic concepts of e- business and e-commerce. CO2: Understanding of the basic concepts of website creation, registration of domain name and website hosting.
BCA-6th Semester Application Development using VB.Net BCA-16-602	CO1: Use Visual Studio IDE to design applications. CO2: Develop GUI Application using Form Controls and its events. CO3: Apply Object Oriented concepts in GUI Application. CO4: Use of data access controls to store data in Database and retrieve it. CO5: Use Data binding in GUI Application.
BCA-6th Semester Computer Graphics and Multimedia Applications BCA-16-603	CO1: Detailed knowledge of Computer Graphics and Multimedia Applications in the Real World, Training and Education, Image Processing, in home and office. CO2: Understanding of various commands in 'C' to develop Computer Graphics programs and applications Using 'C'. CO3: Understanding of the basic working of AutoCAD including commands for line drawing, circle drawing, polygon drawing, transformation of objects, scaling, viewing, and curve designing and modeling algorithms. CO4: Learnt the features and various tools of Photoshop. CO5: Gain knowledge of the features and basics of Macro Media Director to create simple animations.
BCA-6th Semester (Lab based on BCA-16-603) BCA-16-604	CO1: Development of Computer Graphics programs and applications Using 'C'. CO2: Implementation of line drawing, circle drawing, polygon drawing, transformation of objects, scaling, viewing, and curve designing and modeling algorithm using Auto CAD. CO3: To learn and perform various photo-editing operations, to add special effects and to learn how to make Birthday cards, Invitations, Photo collages etc. using PhotoShop.

	CO4: Creation of Animations using Macro MediaDirector.
BCA-6th Semester Major Project and Seminar BCA-16-605	CO1: Implementation of project on real world problems. CO2: Proper time planning for the project. CO3: Effective trouble-shooting of the project. CO4: Demonstrate a thorough and systematic understanding of project contents.

BSC (NON-MEDICAL)

Program Outcomes

PO1: Life-long learning and enhancing intellectual skills. PO2:

Problem analysis and technology usage.

PO3: Environment ethics.

PO4: Inculcating oral and written communication skills.

PO5: Competency and comprehensive knowledge to qualify competitive examinations conducted by PPSC/UPSC/SSC.

PO 6: Attend higher-level degree programmes in the area.

Program Specific Outcomes

PO1: Develop understanding of major concepts in all disciplines of chemistry like Inorganic, Organic, Physical chemistry and Analytical chemistry.

PO2: Gain proficiency in logical deduction skills through written problems and laboratory work. PO3: Explore modern research in chemistry and physics which can lead to technologies that aim to benefit the environment, conserve and produce energy and hence improve human life.

PO4: Learn how to use the proper tools and techniques to tackle both simple and complex problems in the fundamental mathematical disciplines.

PO5: Develop the skill of qualitative and quantitative analysis of compounds for industrial applications in pharmaceutical, chemical and agrochemical sectors.

Course Name and Code	Course Outcomes
Paper A: Mechanics-I (Code-0046)	CO1: Gain basic understanding of Cartesian and spherical coordinates systems.

Extended Course

	<p>CO2: Learn regarding various forces in nature and Space time symmetries.</p> <p>CO3: Detailed knowledge of Centre of mass of system of particles, Motion under central forces, and Kepler's laws.</p> <p>CO4: In-depth understanding of different types of collision such as Elastic and Inelastic collisions in Lab and C.M. systems.</p> <p>CO5: Analyse Rutherford Scattering and overview regarding differential scattering cross-section.</p>
<p>Paper B: Vibrations, Waves & E.M. Theory-I (Code-0047)</p>	<p>CO1: Understand and learn about characteristics of simple harmonic motion and its differential equation.</p> <p>CO2: Learn about damped mechanical and electrical harmonic oscillators.</p> <p>CO3: Gain knowledge about forced mechanical and electrical harmonic oscillator.</p> <p>CO4: Study Various parameters in different types of oscillators such as quality factor, logarithmic decrement, amplification factor and bandwidth.</p>
<p>Paper C: Electricity And Magnetism-I (Code-0048)</p>	<p>CO1: Enhance knowledge regarding the basic ideas of Vector Calculus</p> <p>CO2: Learn about physical significance of Gradient, Divergence, Curl in cartesian coordinates.</p> <p>CO3: Understand the applications of vector calculus as Gauss's Divergence theorem, Green's theorem and Stokes theorem.</p> <p>CO4: Study in-depth about electrostatics and laws governing the charge distribution.</p> <p>CO5: Describe Polarization, bound charges and boundary conditions.</p>
<p>Laboratory Practicals:</p>	<p>CO6: Perform precise measurements of diameter, length, time and thickness.</p> <p>CO7: Understand the concept of moment of inertia by using different geometrical shapes.</p> <p>CO8: Learn the concept of acceleration due to gravity using different types of pendulums such as compound pendulum and Kater's pendulum.</p>
<p>Physics -2nd Semester Paper A: Mechanics-II (Code-0148)</p>	<p>CO1: Develop intrinsic interest in the study of motion of objects in different frames of references.</p> <p>CO2: Gain in-depth knowledge regarding Motion of Rigid Body, Euler's equations.</p>

	<p>CO3: Learn about stationery universal frame and ether using Michelson Morley experiment.</p> <p>CO4: Understand special theory of relativity and its applications such as length contraction, time dilation etc. with detailed study of mass-energy equivalence and Doppler effect.</p>
<p>Paper B: Vibrations, Waves & E.M. Theory-II (Code-0149)</p>	<p>CO1: Understand and learn about wave equation and its solution.</p> <p>CO2: Learn about transverse waves on a string and characteristic impedance.</p> <p>CO3: Understand the physical meaning of Maxwell's equations.</p> <p>CO4: Study and understand electromagnetic waves in conducting medium.</p>
<p>Paper C: Electricity And Magnetism-II (Code-0150)</p>	<p>CO1: Understand the concept of magnetic field using Biot-Savart and Ampere Laws.</p> <p>CO2: Learn and Understand vector potential, Faraday's law and displacement current.</p> <p>CO3: Demonstrate self and mutual inductance in solenoid.</p> <p>CO4: Understand the behaviour of different substances in magnetic field.</p>
<p>Laboratory practicals:</p>	<p>CO1: Understand and learn about elastic constants and related quantities.</p> <p>CO2: To have the knowledge of electric circuits using inductor, capacitor and resistor and study its impedance behaviour.</p> <p>CO3: Demonstrate the use of Carey Fosters Bridge, De-Sauty's Bridge and Anderson Bridge.</p>
<p>Physics-3rd Semester Paper A: Statistical Physics And Thermodynamics-I (Code-0247)</p>	<p>CO1: Learn the basic ideas of Statistical Physics.</p> <p>CO2: Understand the relation between microscopic, macroscopic and thermodynamic probability and the effect of constraints.</p> <p>CO3: Learn the equilibrium dynamic system and distribution of n particles in different compartments and cells.</p> <p>CO4: Study the basic concept of phase space.</p>

	CO5: Understand the basic approach and compare three statistics: MB statistics, BE statistics and FD statistics.
Paper: B Optics And Laser-I (Code-0248)	CO1: Understand the phenomena of interference and related theorems. CO2: Learn the different events like reflection, refraction, interference, diffraction etc. and their applications. CO3: Understand the intensity distribution of light in different optical instruments like Michelson Morley experiment, Young double slit's experiment and Fresnel biprism. CO4: Learn the resolving power of telescope, microscope and prism. CO5: Understand the concept of polarization of light.
Paper C: Quantum Mechanics-I (Code-0249)	CO1: Understand the behaviour of matter and energy at atomic and subatomic level. CO2: Detailed knowledge about the origins of quantum mechanics, fundamental postulates of quantum mechanics, Eigen values and Eigen functions and operator formalism. CO3: Learn about Planck's Formula of Black Body radiation and its applications. CO4: Develop the idea of Wave-particle duality of matter and understanding of various effects such as Photoelectric effect, X- ray diffraction, Compton effect, Pair production. CO5: In-depth understanding of Schrodinger equation and its various applications such as Particle in a Box, Step Potential and Harmonic Oscillator.
Laboratory Practicals:	CO6: Identify and learn optical components and systems. CO7: Identify and understand the use of different models for light. CO8: Ability to learn and operate some important types of optical instruments.
Physics -4th Semester Paper A: Statistical Physics And	CO1: Understand the definition of Entropy, reversible and irreversible processes and law of increase of entropy.

<p>Paper A: Condensed Matter Physics – II (Code-0544)</p>	<p>CO2: Gain insights of magnetic phenomena in solids. CO3: Gain the knowledge of superconductivity phenomenon. CO4: Enhance the knowledge of liquid crystals and their applications. CO5: Gain insights of fast emerging field of nanotechnology.</p>
<p>Paper B: Electronics And Solid-State Devices – II (Code-05)</p>	<p>CO1: Acquire the detailed knowledge regarding the structure, working and characteristics of JFET and MOSFET. CO2: Understand about various types of oscillators and feedback amplifiers. CO3: Enhance the knowledge regarding characteristics and applications of operational amplifiers. CO4: Convert binary and decimal numbers and also simplification of logic circuits using Boolean algebra and various logic circuits. CO5: Gain knowledge about analog and digital communication system and modulation-demodulation.</p>
<p>Paper C: Nuclear & Particle Physics – II (Code-0546)</p>	<p>CO1: Gain insight about the different types of nuclear radiations and their interactions. CO2: Analyse the various factors responsible for energy loss mechanism. CO3: In-depth knowledge regarding various radiation detectors such as Gas-filled detectors, Semiconductor detectors and Scintillation detectors. These studies include their principle, construction and working. CO4: Understand the basics of Elementary particles and details regarding their lifetimes, parity, hypercharge and many more important properties. CO5: Learn the role of symmetry and conservation laws and describe Quark model. CO6: Enhance the knowledge regarding working of various particle accelerators and Accelerator facilities available in India.</p>
<p>Laboratory Practicals:</p>	<p>CO7: Study of input and output characteristics of Common Emitter and Common Base of a transistor (pnp or npn). CO8: In-depth study of output and mutual characteristics of an FET</p>

Laboratory Practicals:	<p>CO6: This laboratory course will enable the students to synthesize various organic compounds like iodoform, meta dinitrobenzene, aniline, methyl orange.</p> <p>CO7: Stereochemical study of organic compound via a model.</p> <p>CO8: Column chromatography for separation of organic dyes.</p>
Maths-1st Semester Paper A: Plane Geometry (Code-0043)	<p>CO1: Understand the concept of ellipse hyperbola and rectangular hyperbola</p> <p>CO2: Identify the concept of a circle and co-axial family of circles</p> <p>CO3: Shift of origin and rotation of axis into 2 dimensions</p> <p>CO4: Learn the concept of parabola, its tangent, pole, polar and equation of chord of contact etc.</p> <p>CO5: Determine the equation of the pair of straight lines, angle between them and the joint equation of the angle bisector</p>
Paper B: Calculus I (Code-0044)	<p>CO1: Determine nth order derivative of a product of 2 functions using Leibniz's theorem</p> <p>CO2: Learn the concept of inequalities</p> <p>CO3: Understand the concepts of Limits and continuities</p> <p>CO4: Determine Rolle's theorem, Lagrange's mean value theorem, Cauchy's theorem</p> <p>CO5: Evaluate indeterminate form of limits</p>
Paper C: Trigonometry Matrices (Code: 0045) And	<p>CO1: Understand exponential, logarithmic circular and hyperbolic functions of a complex variable.</p> <p>CO2: Understand the concept of primitive nth root of unity.</p> <p>CO3: Compute complex no. using De Moivre's theorem</p> <p>CO4: Determine the rank of the matrix by normal, elementary row transformation, echelon form</p> <p>CO5: Learn the concept of consistent and inconsistent system of Linear equations by the row echelon form of the augmented matrix using rank</p>

	<p>CO6: Determine the characteristic equation, its eigen values and corresponding eigen vector of a given matrix</p> <p>CO7: Verify Cayley Hamilton theorem and using it to find the inverse of matrix</p>
<p>Maths -2nd Semester Paper A: Solid Geometry (0145)</p>	<p>CO1: Understand the concept of sphere and co-axial family of spheres</p> <p>CO2: Express cylinder as a surface generated by a line moving parallel to a fixed line and through a fixed curve</p> <p>CO3: Learn about different kinds of cones such as right circular, elliptic and enveloping cones</p> <p>CO4: Understand the concept of ellipsoid, hyperboloid and paraboloid</p> <p>CO5: Identify curves represented by 2nd degree equations in 3 variables</p>
<p>Paper B: Calculus II (Code-0146)</p>	<p>CO1: Use the concepts of concavity, convexity, and multiple points, determining the type of curve and the location of the double point.</p> <p>CO2: Find the curve's length using rectification, the curve's area using quadrature, and the solids of revolution volume.</p> <p>CO3: Learn about various curves through curve tracing and get accustomed to curvature</p> <p>CO4: Use reduction formulas to get the integral problem's solution</p> <p>CO5: Learn about the idea of summation series.</p>
<p>Paper C: Theory Of Equations (Code-0147)</p>	<p>CO1: Figure out the g.c.d. of the polynomials and solving them.</p> <p>CO2: Determine the relationship between an equation's coefficient and roots.</p> <p>CO3: Transform the axis from one equation to another.</p> <p>CO4: Solve Biquadratic equations using the Descartes and Ferrari technique.</p> <p>CO5: Use Descartes's rule of signs</p>
<p>Maths-3rd Semester Paper A: Advanced Calculus – I</p>	<p>CO1: Calculate the maximum and minimum values of functions with two and three variables.</p>

	CO2: Find the matrix that corresponds to the linear transformation; learning the matrix's eigenvalues and eigenvectors; and being familiar with the Cayley-Hamilton theorem and its applications.
Paper C: Numerical Analysis (Code: 0543)	CO1: Solve Analytic problems using numerical approximation. CO2: Utilize numerical techniques to solve transcendental equations and examining the convergence. CO3: Create numerical techniques for interpolation, differentiation, integration, ordinary differential equations, and matrices; evaluate the methods' accuracy; and contrast the numerical.

Class/ Code/ Course Name	Course Outcomes
COMPUTER SCIENCE- 1st Semester Paper-CS01 Theory-A Computer Fundamentals	CO1: Understanding of basic Computer Terminology. CO2: Formulation of opinions about the impact of computers on society. CO3: Acquire a fundamental understanding of hardware peripherals. CO4: Develop interests in using computers for professional work.
CS - 1st Semester Paper -CS02 Theory-B PC Software	CO1: Work effectively with a range of current, standard, Office Productivity software applications. CO2: Understanding of operating system – Interface and organizing files and folders. CO3: Operate a variety of advanced spreadsheet, operating system and word processing functions. CO4: Evaluate, select and use office productivity software appropriate to a given situation.

<p>Semester I</p>	<p>concepts.</p> <p>CO 2: Familiar to the renowned poets and their historical backgrounds.</p> <p>CO 3: Gain knowledge about brief description of the poems and associate's learnings.</p> <p>CO 4: Learn the Phonetics and Punjabi phonemes.</p>
<p>BSc with Punjabi (General) as compulsory subject</p> <p>Semester II</p>	<p>After successful completion of syllabus, the students will be able to:</p> <p>CO 1: Learn the prescribed stories equip students with understanding of social and cultural issues.</p> <p>CO 2: Familiarized with various aspects of short story writing of the prescribed period.</p> <p>CO 3: Learn of life from the diverse texts concerned about values of life, struggles and hardships of common man.</p> <p>CO 4: Understand the prescribed grammar section will help understand idioms and phonetics. It improves the writing skills of the students.</p>
<p>Bsc with History and Culture of Punjab as compulsory subject</p> <p>Semester I</p> <p>Paper: History and Culture of Punjab from earliest times to 1849 (code:0092)</p>	<p>CO1: Understand the human evaluations like the transformations occurred right from Indus valley civilization.</p> <p>CO2: Compare and contrast various stages of progress from Indus valley civilization to Vedic age. Analyse the Jain, Buddhist and Vedic faiths.</p> <p>CO3: Analyse the emergence of the Mauryan and Gupta empires during the "Classical age" in Punjab. Critically examine the nature of monarchic rule and develop a comprehensive understanding of cultural evolution during ancient period.</p> <p>CO4: Develop understanding about the origin and growth of Sikhism and various institutions as well as Bhakti and Sufi movement. Understand martyrdoms of Sikh Gurus and creation of Khalsa organisation. Understand social and cultural conditions of Maharaja Ranjit Singh.</p> <p>CO5: Visualize where places are in relation to one another through map pointing.</p>
<p>Semester II</p> <p>Paper: History and Culture of Punjab in the colonial (code: 0192)</p>	<p>CO1: After completion of the course, student came to know about the reasons which led to establishment of the British rule in the Punjab, Board of administration. Analyse British policy towards education.</p>
